

The background is a solid dark grey or black. It is decorated with several thin, light purple lines that are drawn in a loose, scribbled, and looping fashion. These lines are scattered across the frame, with some forming loops and others being more fluid, wavy strokes. They appear to be hand-drawn or generated by a simple line-drawing algorithm.

Clide.

Slide Smoothly~

Inspiration

Isn't switching slides such a huge inconvenience?

- Disruption caused by technical difficulties
- Disorder of presents bustling
- Teachers become less productive
- Wasted time! >:(
- THE PANIC OF PRESENTING!!!!

There has to be a better way to do this...

What is Clide?

A simpler way to present!!!

- Say goodbye to the need for keyboards!
- Simply upload a pdf!
- Allows for the teacher to choose a presenter
- Mobile interface turns into a clicker that can switch through slides
- Each group member can control the slides!
- Members of the audience (students) can provide supportive reactions by joining the presentation room

Fosters positive interactions between students and saves time!!!

How was it built?

- Brainstorming
- Division of tasks
- Svelte and node.js
- Websocket layers
- Socket.io

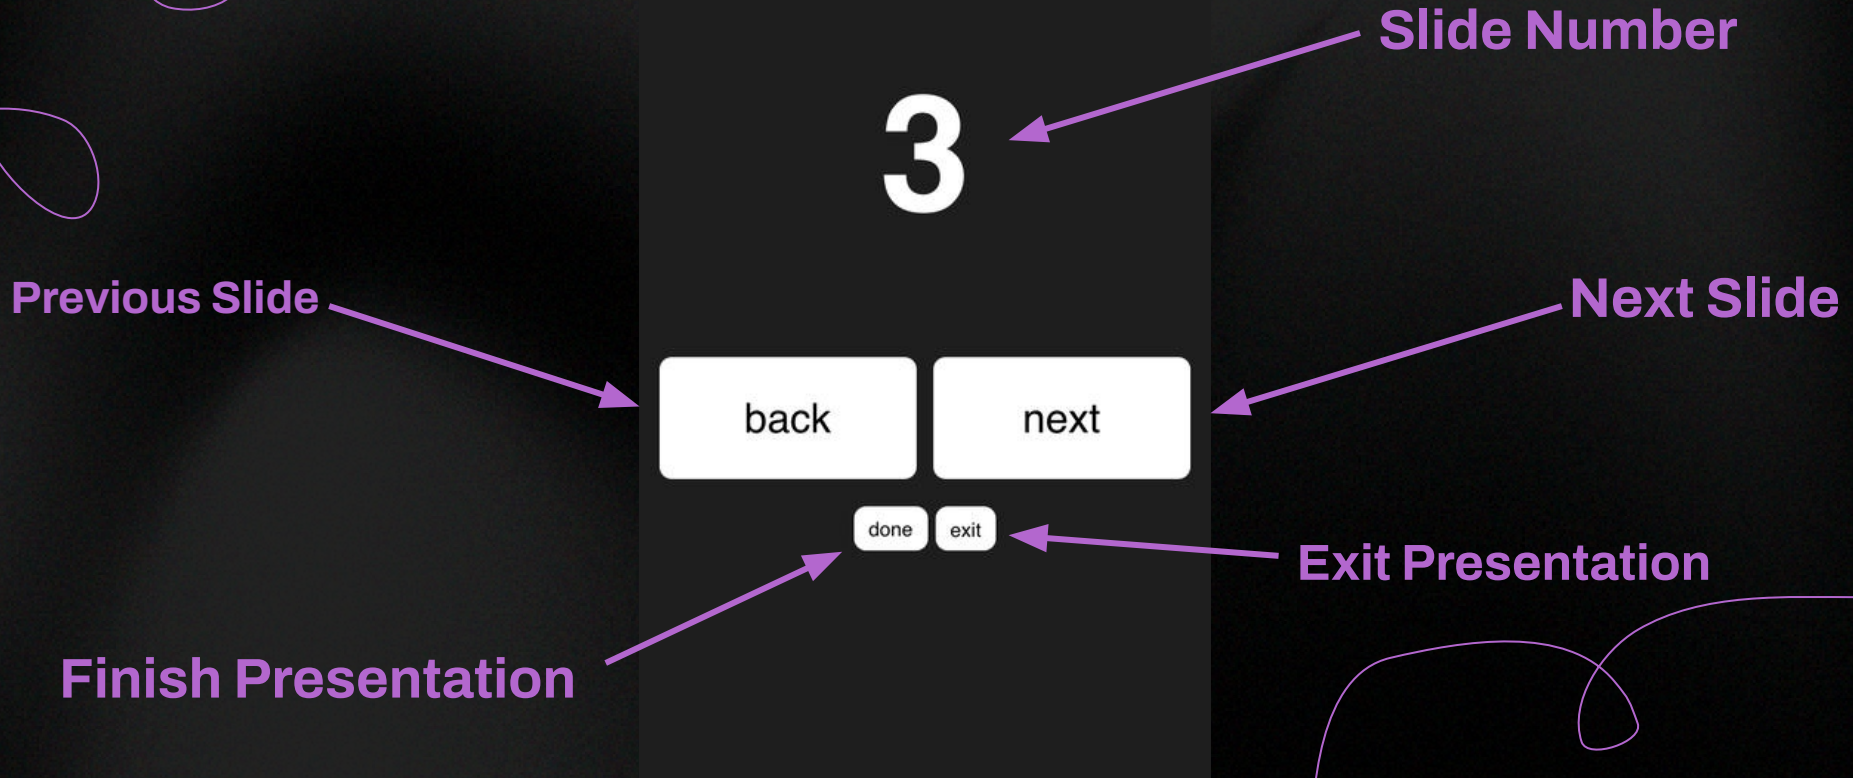

**MOST IMPORTANTLY: The power of
friendship!**

Challenges we ran into:

- Creating concurrency (buttons and slides working simultaneously)
- Managing server states
- Learning the lingo and intricacies of webdev

Worst of all: doing web dev...

Phone Screen

The background is a solid dark grey or black. It is decorated with several thin, light purple lines that form abstract, flowing, and looping shapes, resembling calligraphic flourishes or smoke. These lines are scattered across the frame, with some entering from the top and others from the sides, creating a sense of movement and elegance.

**Slide
Smoothly
with Clide!**
